# IP BASED NURSE CALL SYSTEM

BEDSIDE CALL UNIT

Bedside call unit has two buttons with two different colors for assistance calls (red), and for staff presence and reset (green). When a resident presses on the red button, it will send visual and audible alert signals to the warning lamp and nurse desk station. When staff presence they press the green button and once they finish up with the resident they press on the green button one more time to reset the bedside call unit.

Nurse Call Button — Call Stop Button
