WIRED NURSE CALL SYSTEM

ADDRESS MODULE

Address module transfers data between calling units and warning lamps, multiple address modules can be connected together creating a bridge between them. A single address module supports one calling unit and one warning lamp. Address module runs with a binary number system. Its durable structure and modern software ensure the best operating time and performance.

TECHNICAL SPECIFICATIONS:

Weight	68 gr
Width	89 mm
Height	61 mm
Depth	32 mm
Operating Temperature	-10ºC / +50ºC
Operating Humidity	%30 / %80 RH
Material	ABS, Plastic
Color	White
Power Supply	12V 5A
Processor	Microcontroller
Communication	RS-485
Number of Ports	One Call Unit and One Lamp
Input Port Type	RJ-45
