

WIRED NURSE CALL SYSTEM

ROOM CONTROL UNIT

Room control unit functions as a data transfer, when there is a demand to have multiple calling units with different ID numbers in the same room. It has an option to add-up a relay unit, which would allow residents to control room light and reading light from handset call unit. A single room control unit supports up to three beds and one bathroom. The system runs using binary networks.

TECHNICAL SPECIFICATIONS:

Weight	146 gr
Width	123 mm
Height	79 mm
Depth	36 mm
Operating Temperature	-10°C / +50°C
Operating Humidity	%30 / %80 RH
Material	ABS, Plastic
Color	White
Power Supply	12V 5A
Processor	Microcontroller
Communication	RS-485
Port Type	RJ-45
