

WIRED NURSE CALL SYSTEM

T-MODULE (MULTIPLEXER)

T-Module enables the installation of multiple calling units and warning lights in the same room. Calling units that share the same t-module have a single ID, so when a call is made regardless of which calling unit or the number of calling units made the call, it shows a single ID on the local panel. T-Module works according to parallel connection structure.

TECHNICAL SPECIFICATIONS:

Weight	24 gr
Width	55 mm
Height	37 mm
Depth	20 mm
Operating Temperature	-10°C / +50°C
Operating Humidity	%30 / %80 RH
Material	ABS, Plastic
Color	White
Processor	Microcontroller
Port Type	RJ-45
