

WIRED NURSE CALL SYSTEM

TRANSMITTER

Transmitter is an electronic device that generates radio frequency, which would help in transmitting and receiving data between pagers and other units in nurse call system.

TECHNICAL SPECIFICATIONS:

Weight	230 gr
Width	84 mm
Height	97 mm
Depth	24 mm
Operating Temperature	-10°C / +50°C
Material	ABS
Color	Grey
Power Supply	110-240 VAC
Power (Watt)	0.3 W
Processor	Microcontroller
Communication	Wireless
Port Support	USB or RS-232 Port Supported
Modulation Type	FSK
Wireless Frequency	402-470 MHz
